WORK EXPERIENCE

CACI International, Inc
2022 – Present

Software Developer (Full Stack) *Remote*

- Collaborate remotely with Agile teams to design, build, and test code using modern technologies such as TypeScript, Java, React, Redux, Spring Boot, ElasticSearch, Git, GitLab, and PostgresQL.
- Designed, created, maintained, and updated backend REST APIs.
- Develop software with large graph-based datasets for user analysis, planning, and implementation.
- Ensure code quality and coverage through rigorous unit and integration testing and automation.
- Facilitate the rework of legacy projects, leading to significant performance and efficiency gains.

Micro Focus
2018 – 2022

Software Engineer II | August 2021 – March 2022 *Provo, UT*

- Led design and maintenance of CI pipelines, integration testing and static code analysis.
- Oversaw security protocols, threat modeling, and vulnerability management.
- Directed QA initiatives for code coverage and quality implementation.

Software Engineer I | August 2019 – August 2021

- Prior to my promotion to Software Engineer II, I wrote and tested security software.

Performance/Load Test Engineer Intern | August 2018 – August 2019

- Prior to my promotion to Software Engineer I, I tested software for load and performance.

United States Marine Corps
2011 – 2015

Airfield Firefighter *Yuma, AZ*

EDUCATION

Utah Valley University
2019

Bachelor of Information Systems, Application Development *Orem, UT*

- **GPA:** 3.8/4.0
- Aikido Club, Gym aficionado
